

# Runway Status Lights

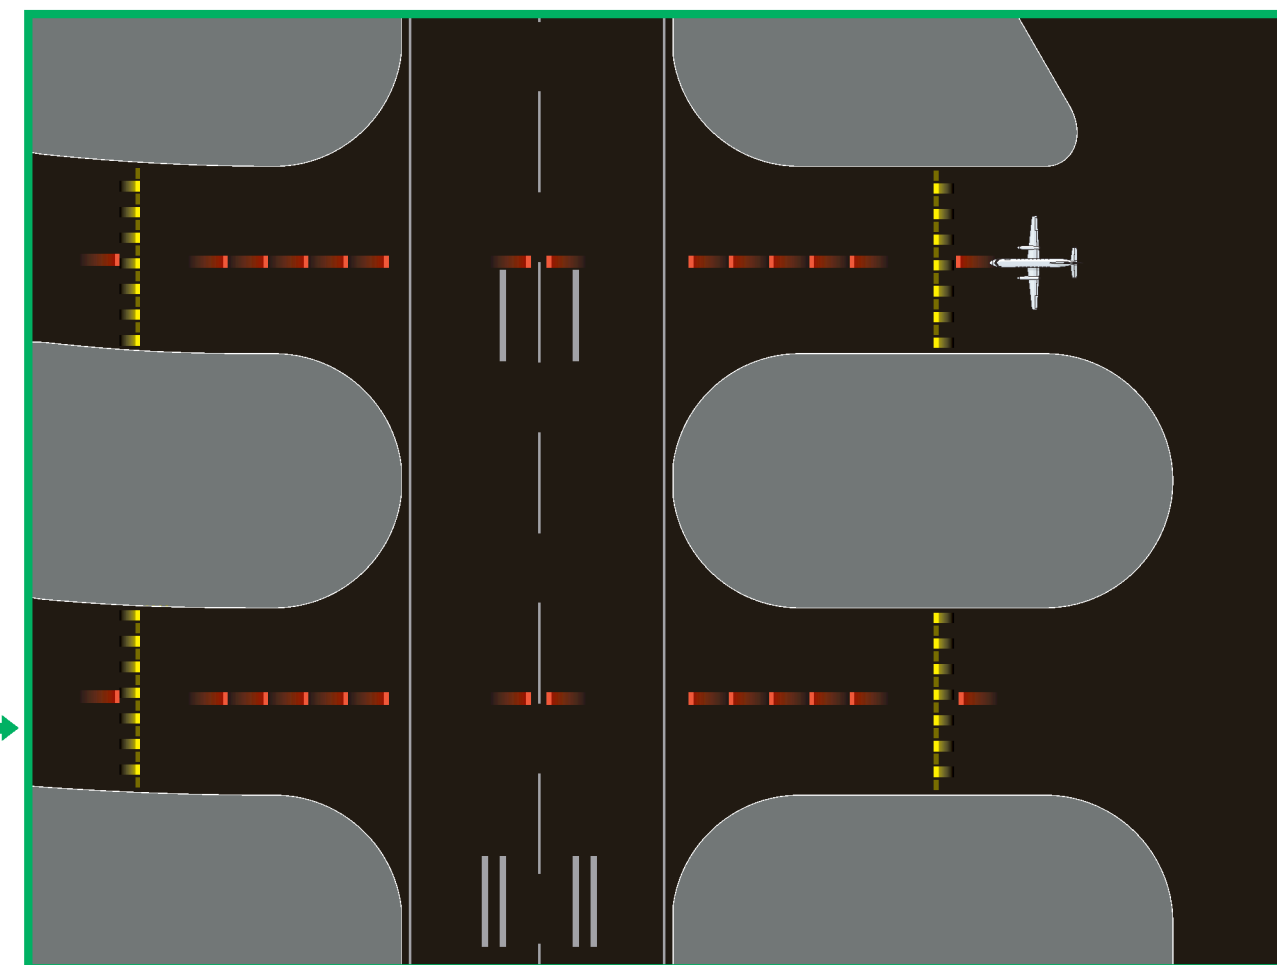

## Purpose: Reduce Runway Incursions and Airport Surface Collisions

Surveillance-Driven RELs Provide Direct Indication That Runway is Unsafe

If RELs are **RED**, stop. RELs are **RED** if runway is not safe to enter. Remember: Lights indicate **status only**, never clearance! Surveillance-driven lights turn on/off to increase situational awareness. RELs at selected intersections as shown.

DFW Operational Evaluation on Runway 18L/36R  
February – May 2005
